

Data Monitoring and Investigations Team Briefing

September 30, 2011

Presented by Mary Fickert Thomas
Parsons Brinckerhoff

Team Objectives

- Develop inventory of available data in Central Florida.
- If approved, develop web-based portal to the available data.
- Develop minimum standards for data collection.
- Identify areas of insufficient or redundant data collection.

Progress

- Developing inventory.
- *Gathering specific, existing data to support current EMT effort.*
- Utilizing existing resources, such as USGS data mine, as starting point for inventory. Plan to add water use permittee data.
- Reviewing sample data collection policies for consideration.

Current EMT Effort

- *Supporting* the plan to quantify link between ecological condition of selected sites and the historical record of water levels.
- *Identified* locations with existing water level data to allow EMT to evaluate current ecological condition at those locations.
