

Data Monitoring and Investigations Team Briefing

December 2, 2011

Presented by Mary Fickert Thomas
Parsons Brinckerhoff

Team Objectives

- Develop inventory of available data in Central Florida.
- Where possible make the data available via the internet.
- Develop minimum standards for data collection.
- Identify areas of insufficient or redundant data collection.

Progress

- Completed draft inventory.
- Delivered specific, existing data to support current EMT and HAT efforts.
- Reviewing agency procedures for consistent minimum data collection standards.
- Testing inventory interfaces.

Future Activities

- Pursue options for inventory distribution and maintenance via the internet.
- Expand team to include members of the District regulatory staff.
- Work towards development of consistent water level and environmental monitoring standards for state and local agencies.
- Develop and implement a plan to identify areas of insufficient or redundant data collection.
