

**TEMPLATE FOR REGULATORY TEAM INPUT  
CONCERNING LIKELIHOOD OF SPT PROJECT PERMITTABILITY<sup>1</sup>**

**Project name and introductory paragraph information**

- (Insert project, per Solutions Planning Team request for Reg Team input)

**Likelihood of Permittability: (See e.g. SJR template)**

- Introductory statement / caveat:
  - Project appears (reasonably permissible / not reasonably permissible) from a planning level perspective based on ....
  - Caveats regarding need to satisfy CUP criteria
  - Project refinements during permit application review may occur and include: (e.g. operational schedule, storage facilities, mitigation, or etc....)

**Anticipated Influence of 8 Identified Topics:**

- Per capita:
- Water Shortage:
- Aquifer recharge & impact offset sources and programs:
- Resource redistribution:
- Caution area example review:
- Interdistrict transfer of ground and / or surface water:
- Public interest:
- Conjunctive use:

**Identification of Legislative or WMD rule changes, if any, associated with project:**

- Insert

**List of additionally identified considerations:**

- E.g.: local sources first, conservation, AWS designation, public interest, s. 373.705(4), others

---

<sup>1</sup> In part, section 373.709(2)(a)2., Fla. Stat., states: "Where the district determines it is appropriate, the plan should specifically identify the need for multijurisdictional approaches to project options that, based on planning level analysis, are appropriate to supply the intended uses and that, based on such analysis, appear to be permissible and financially and technically feasible."
