

2020 CFWI RWSP Approach Options (6/25/2018)

-For discussion purposes. Developed by RWSP & WRAT WMD and FDEP staff

Option 1

- Prepare Water Supply Plan with basic statutory requirements (Analysis/Modeling, list of project options)
- No solutions modeling, but reference possible solutions in text of document. If applicable, summarize simulated solution strategies from 2015 RWSP.

Option 2

- Prepare Water Supply Plan with basic statutory requirements (Analysis/Modeling, list of project options)
- Conduct solutions modeling simulations after plan approval

Option 3

- Prepare Water Supply Plan with basic statutory requirements (Analysis/Modeling, list of project options)
- Conduct solutions modeling concurrent with plan development. Use simulation of select solutions project to ameliorate impacts of withdrawals on natural system.
- This option requires additional time and staff resources
