

## **2025 CFWI Regional Water Supply Plan Technical Methods Workshop Scheduled April 25**

The 2025 Central Florida Water Initiative (CFWI) Regional Water Supply Plan (RWSP) Team will be holding a virtual technical methods workshop April 25, from 10 a.m.-noon. The workshop will cover the technical data and modeling tools anticipated to be used to support the 2025 CFWI RWSP.

St. Johns, Southwest and South Florida water management district (District) staff are in the process of completing the final analyses needed to develop the 2025 CFWI RWSP. The 2025 CFWI RWSP is anticipated to be available for public review in early 2025. The final 2025 CFWI RWSP is scheduled to be approved by the governing boards of the three Districts by the end of 2025.

The CFWI Planning Area consists of all of Orange, Osceola, Seminole, and Polk counties and southern Lake County, covering approximately 5,300 square miles. The 2025 CFWI RWSP will identify existing and projected water needs as well as projects and funding sources to meet those needs over the next 20 years.

The 2025 CFWI RWSP is the second five-year update to the 2015 CFWI RWSP and is a collaborative effort between the Districts and key stakeholders.

A registration link to the virtual technical methods workshop will be available soon and additional information, when available, can be found at [cfwiwater.com/meetings](https://cfwiwater.com/meetings).

For more information on the CFWI RWSP effort, please contact the CFWI District contacts at [cfwiwater.com/contacts.html](https://cfwiwater.com/contacts.html). In addition, CFWI RWSP resources can be found at [cfwiwater.com/CFWIresources.html](https://cfwiwater.com/CFWIresources.html).
