

Vision: *To protect our natural resources and support Florida's growth by ensuring the sustainable use of Florida's water for the benefit of the people of the District and the state.*

Core Missions:

- **Water supply** — To implement a regional strategy to provide sufficient water for users and the environment
- **Flood protection** — To prevent increases in flooding and operate and maintain the District's regional flood control projects
- **Water quality** — To protect and improve water quality within the District
- **Natural systems** — To protect and improve natural systems within the District

Values:

Trust — What we say is what we do.

Earn trust, establish credibility, understand others' viewpoints, inspire the best in our team

Partnership — We can achieve more together.

Build partnerships internally and externally, collaborate, respect contributions, create a welcoming work environment

Accountability — We care about the work we do and how we do it.

Take ownership of our mission, be a role model, challenge ourselves to improve, be fiscally responsible

Results — We provide effective solutions.

Proactively provide excellent customer service, focus on results, problem solve, maintain technical and professional expertise, produce on-time and on-budget
