

Upper Ocklawaha River Basin Flow Chart -- Provisional Data -- All levels in NAVD88 Datum

Current Data as of:
Monday 3/17/2025 9:00

Notes: Primary = The first of two water level recording devices for any lake level.
Redundant = The second recording device, simply a "Back-Up" to the primary, to help insure levels are accurate.
D.T.R. = Days to bring water body DOWN to Regulation Schedule at present discharges.
O.R. = Inches the water body is OVER today's Regulation Schedule.
U.R. = Inches the water body is UNDER today's Regulation Schedule.
W.R. = Winter-time Regulation level, in NAVD88; Apopka = 66.14, Eustis = 62.21, Griffin = 58.21.
AMFW = Apopka Marsh Flow-Way (N-W corner of Lake Apopka).
