

Wekiva Basin MFLs Modeling Peer Review Kick-off and Site Visit

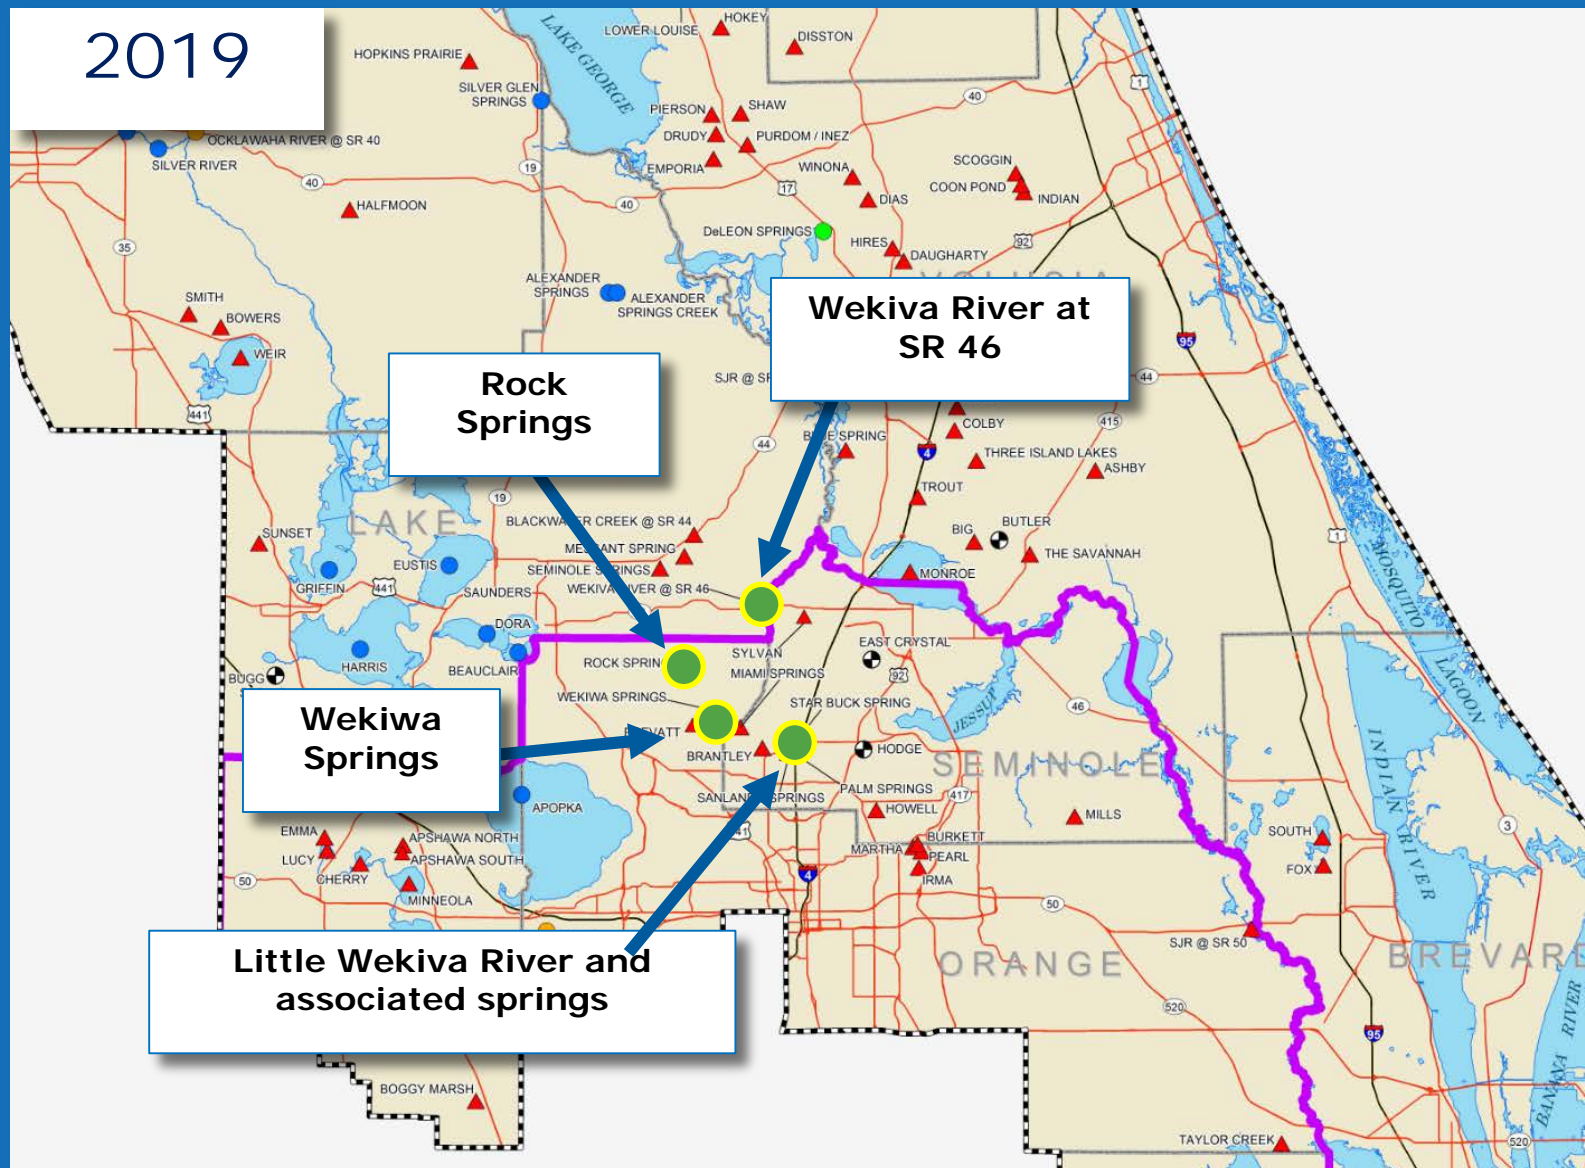

September 26, 2018

Agenda

- **Introductions and meeting objectives**
- **Overview of Wekiva Basin MFLs**
- **Overview of HSPF / HEC-RAS models**
- **Stakeholder comments**
- **Site visit overview**
- **Meeting summary**
- **Stakeholder comments**
- **Meeting adjourn**

Wekiwa Basin MFLs

2019

Statutory Directive

Water management districts must establish MFLs that set...

“...the limit at which further withdrawals would be significantly harmful to the water resources or the ecology of the area.”

Section 373.042(1), Florida Statutes (F.S.)

Statutory Directive

"...consideration shall be given to... non-consumptive uses, and environmental values..." 62-40.473, F.A.C.

- Recreation in and on the water
- Fish & wildlife habitats and the passage of fish
- Estuarine resources
- Transfer of detrital material
- Maintenance of freshwater storage & supply
- Aesthetic and scenic attributes
- Filtration / absorption of nutrients & pollutants
- Sediment loads
- Water quality
- Navigation

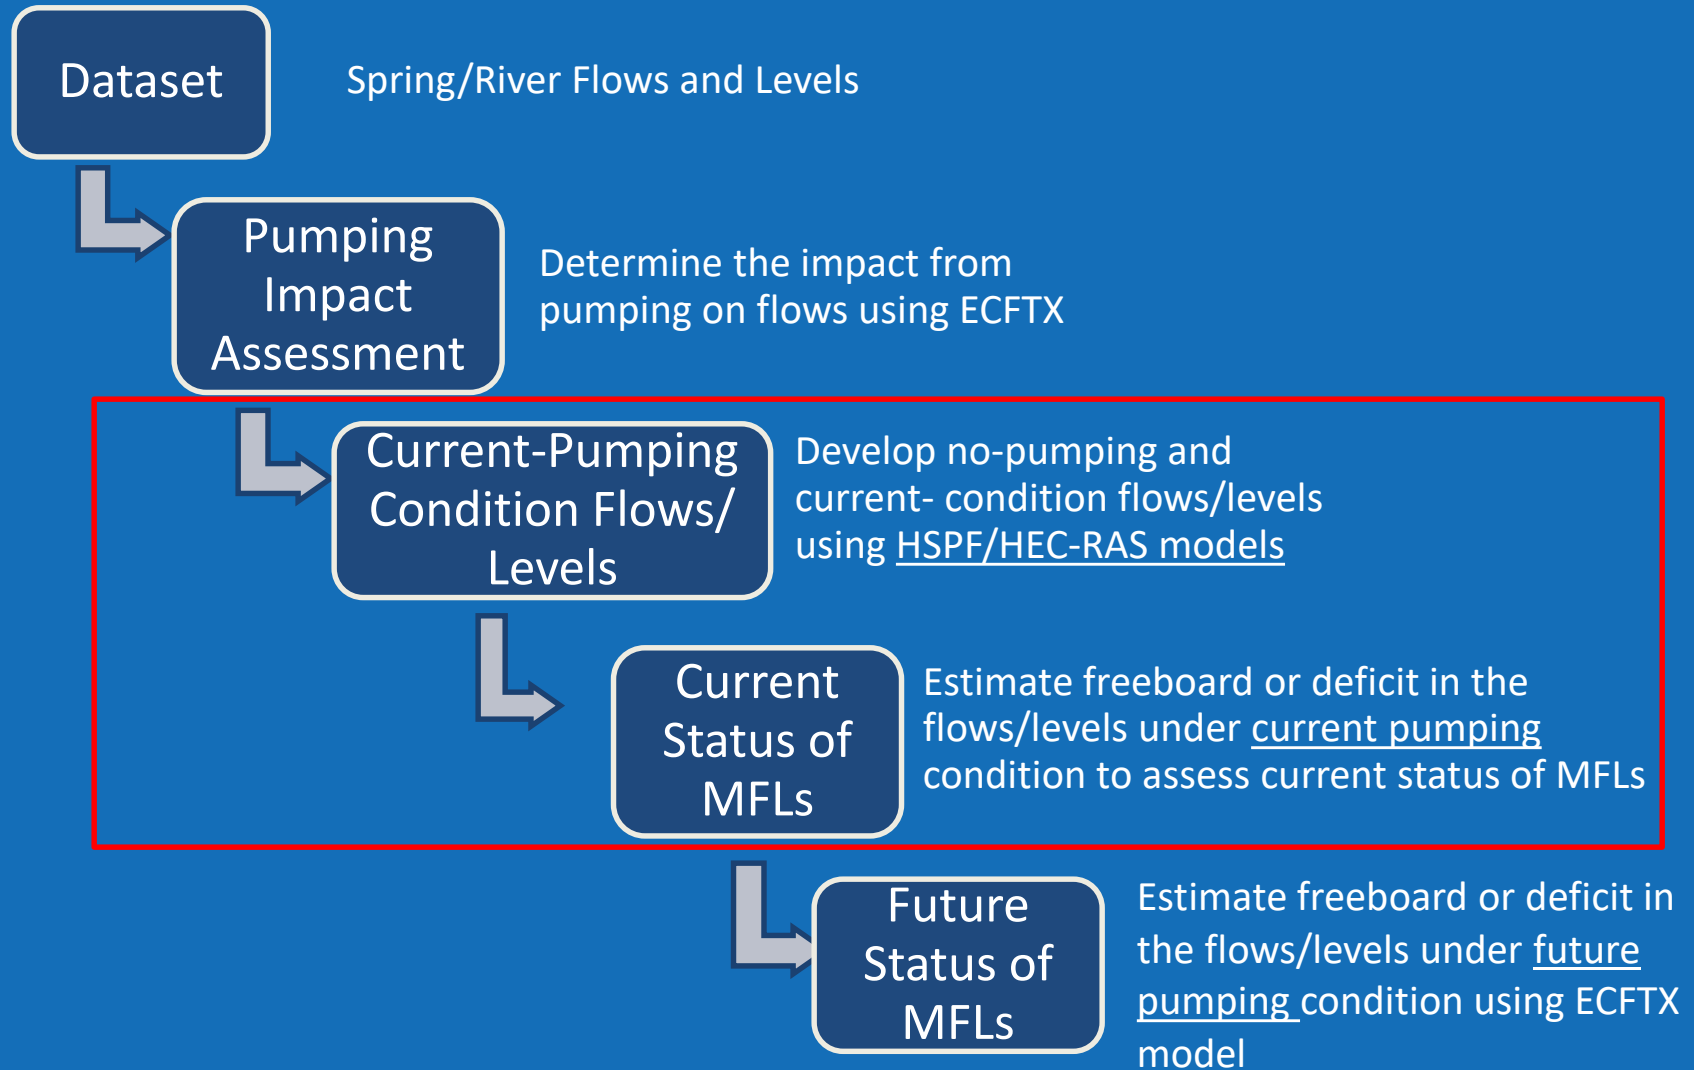

MFL Process Overview

MFL Determination and Assessment

Hydrological Analysis

Use of HSPF/HEC-RAS Models for MFLs

- Evaluation of the effect of pumping on critical stage/flow/velocity profiles needed for WRVs (fish and wildlife habitat, recreation, water quality, etc)
- Stage-flow relationships for evaluation of the effect of flow reduction on WRVs
- Assessment of the current status of MFLs to estimate water availability or deficit

Potential Model Simulations

- Long-term simulations (50-60 yrs)
- Scenarios (by adjusting spring flows boundary condition)
 - Flow reduction simulations (e.g. 1%, 5% and 10% etc.)
 - No-pumping condition simulations
 - Current-pumping condition simulations

Peer Reviewers

- **Patrick Tara, PE**
(Intera, Inc)
- **Silong Lu, PhD, PE, DWRE**
(Dynamic Solutions, LLC)

Hydrologic and hydraulic modeling in the Wekiva River Basin

September 26, 2018

Choung-hyun Seong, PhD

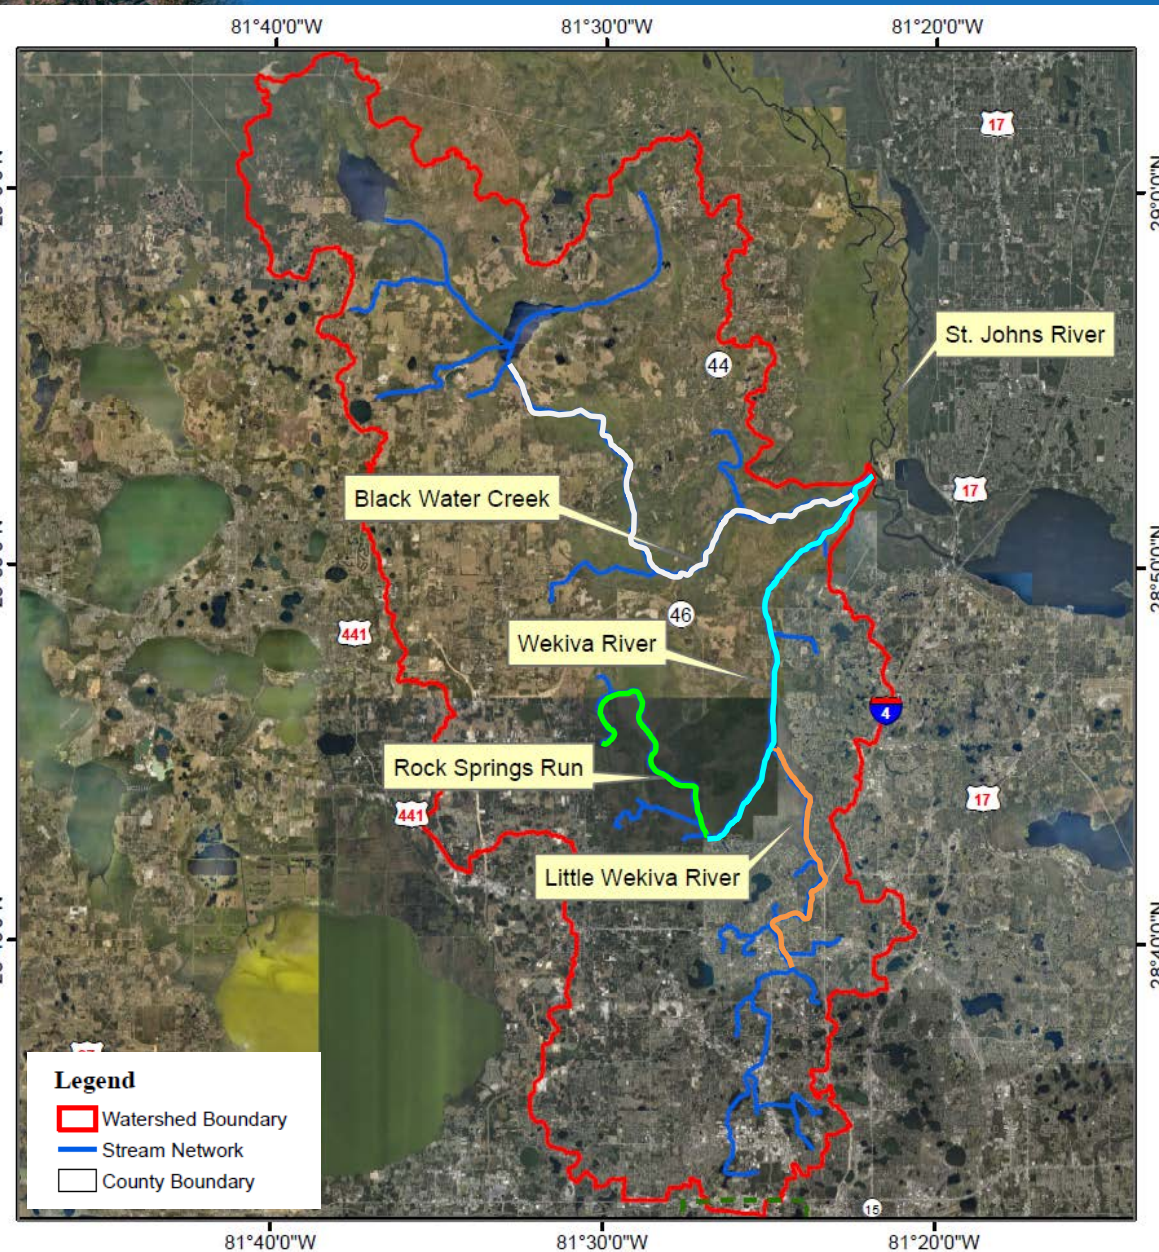

SJRWMD

Contents

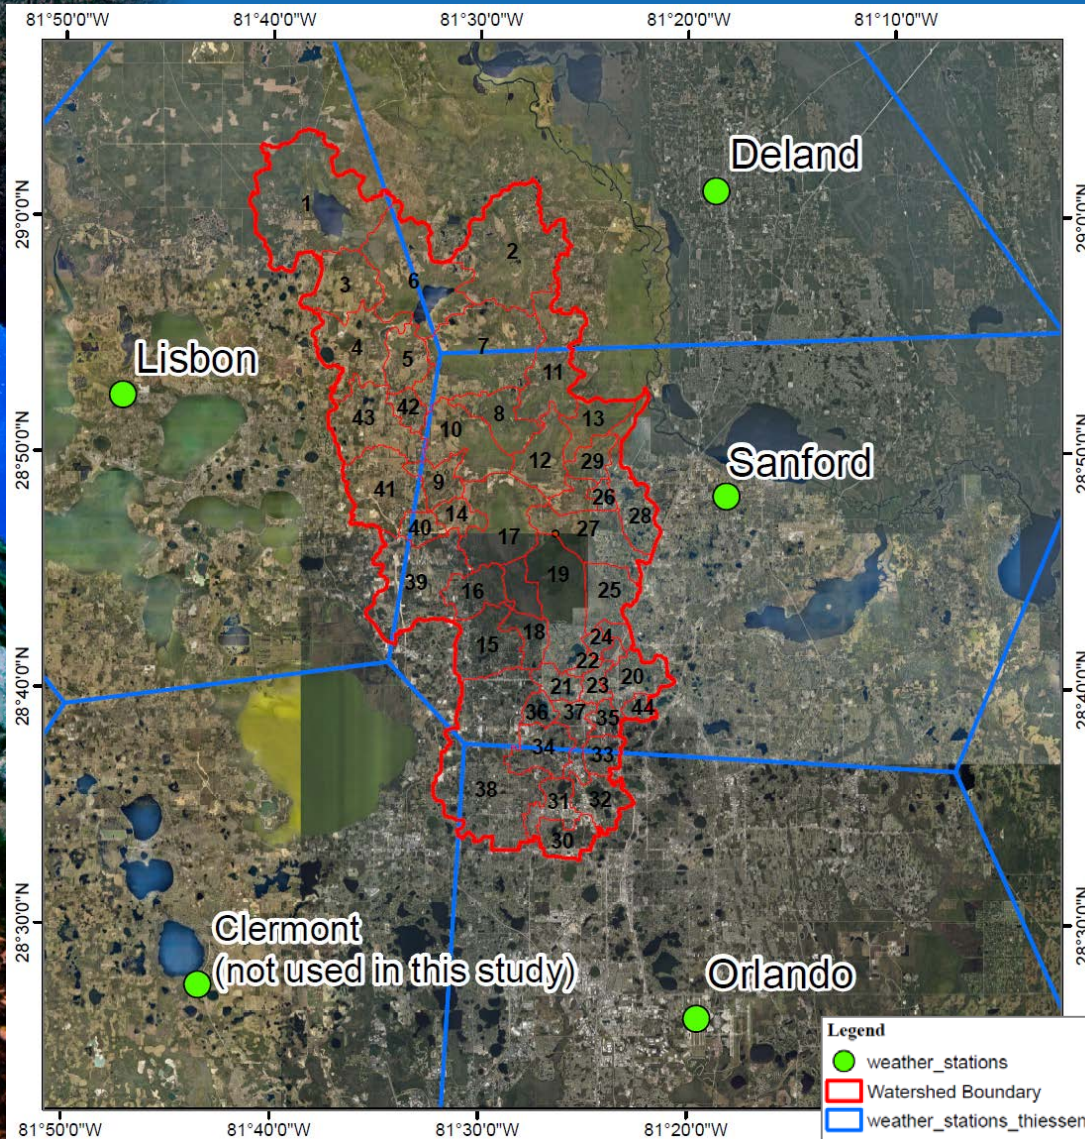

- **Background**
- **Hydrologic modeling (HSPF)**
- **Hydraulic modeling (HEC-RAS)**

Wekiva River Basin

- Area: 376 mi²
- Waterbodies
 - Wekiva River (16 mi)
 - Little Wekiva River (15 mi)
 - Rock Springs Run (9 mi)
 - Black Water Creek (18 mi)

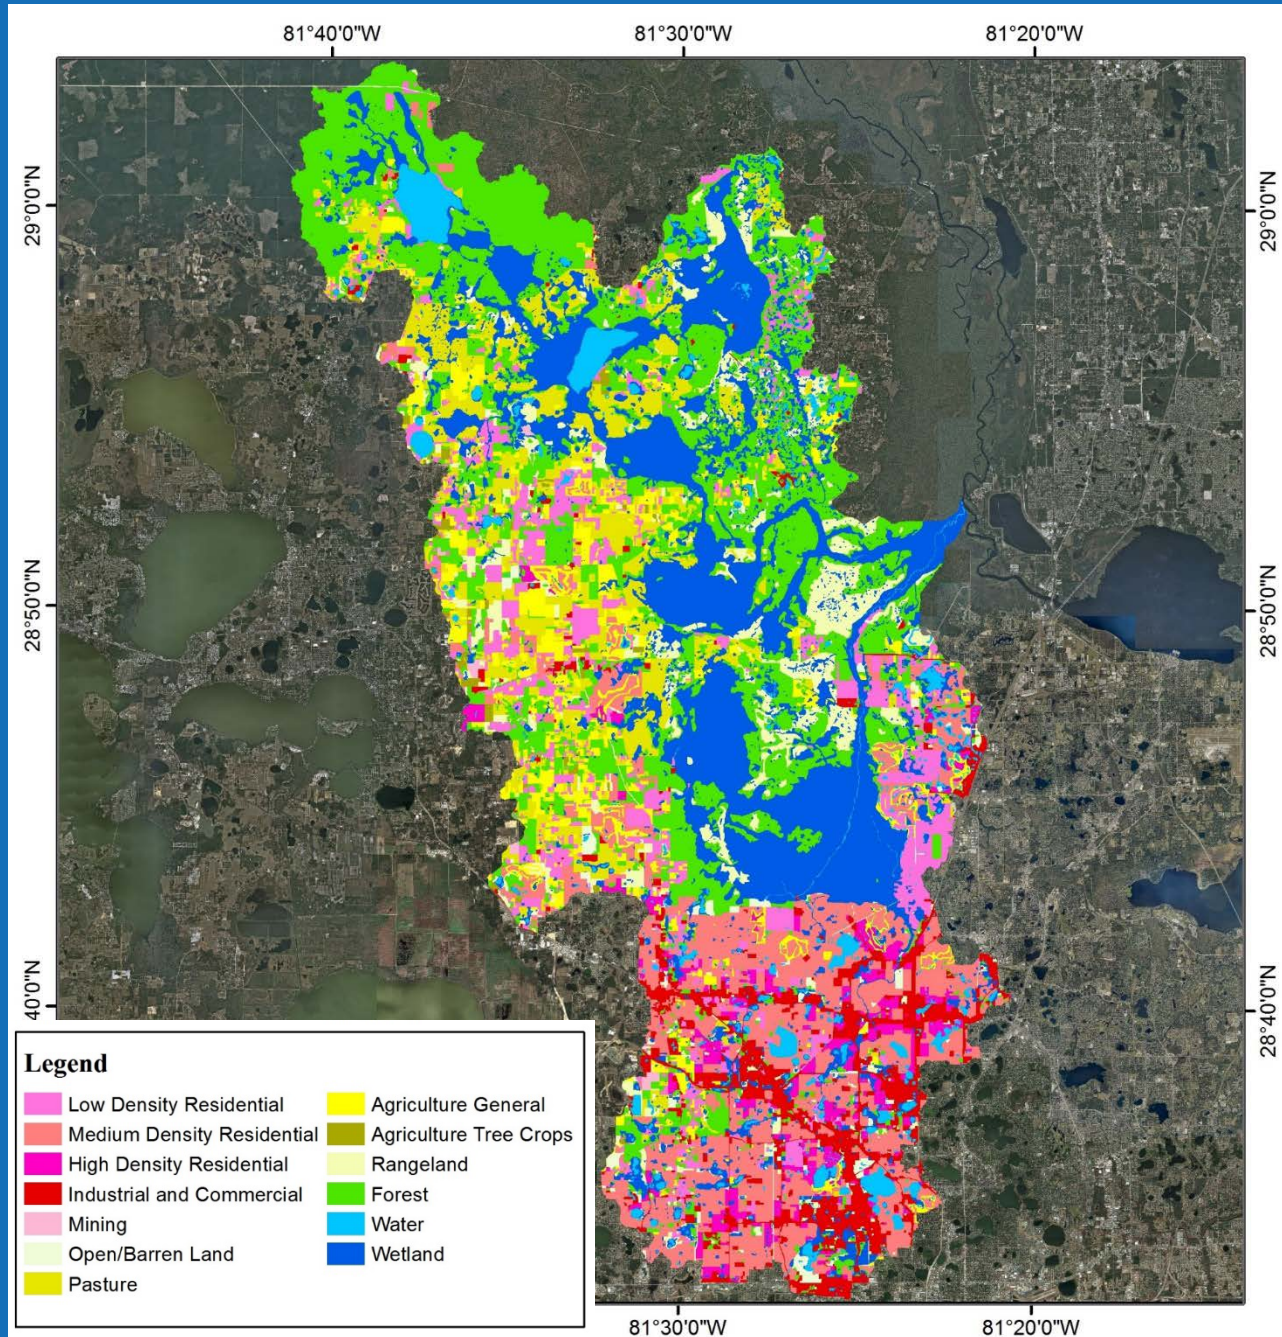

Meteorological data

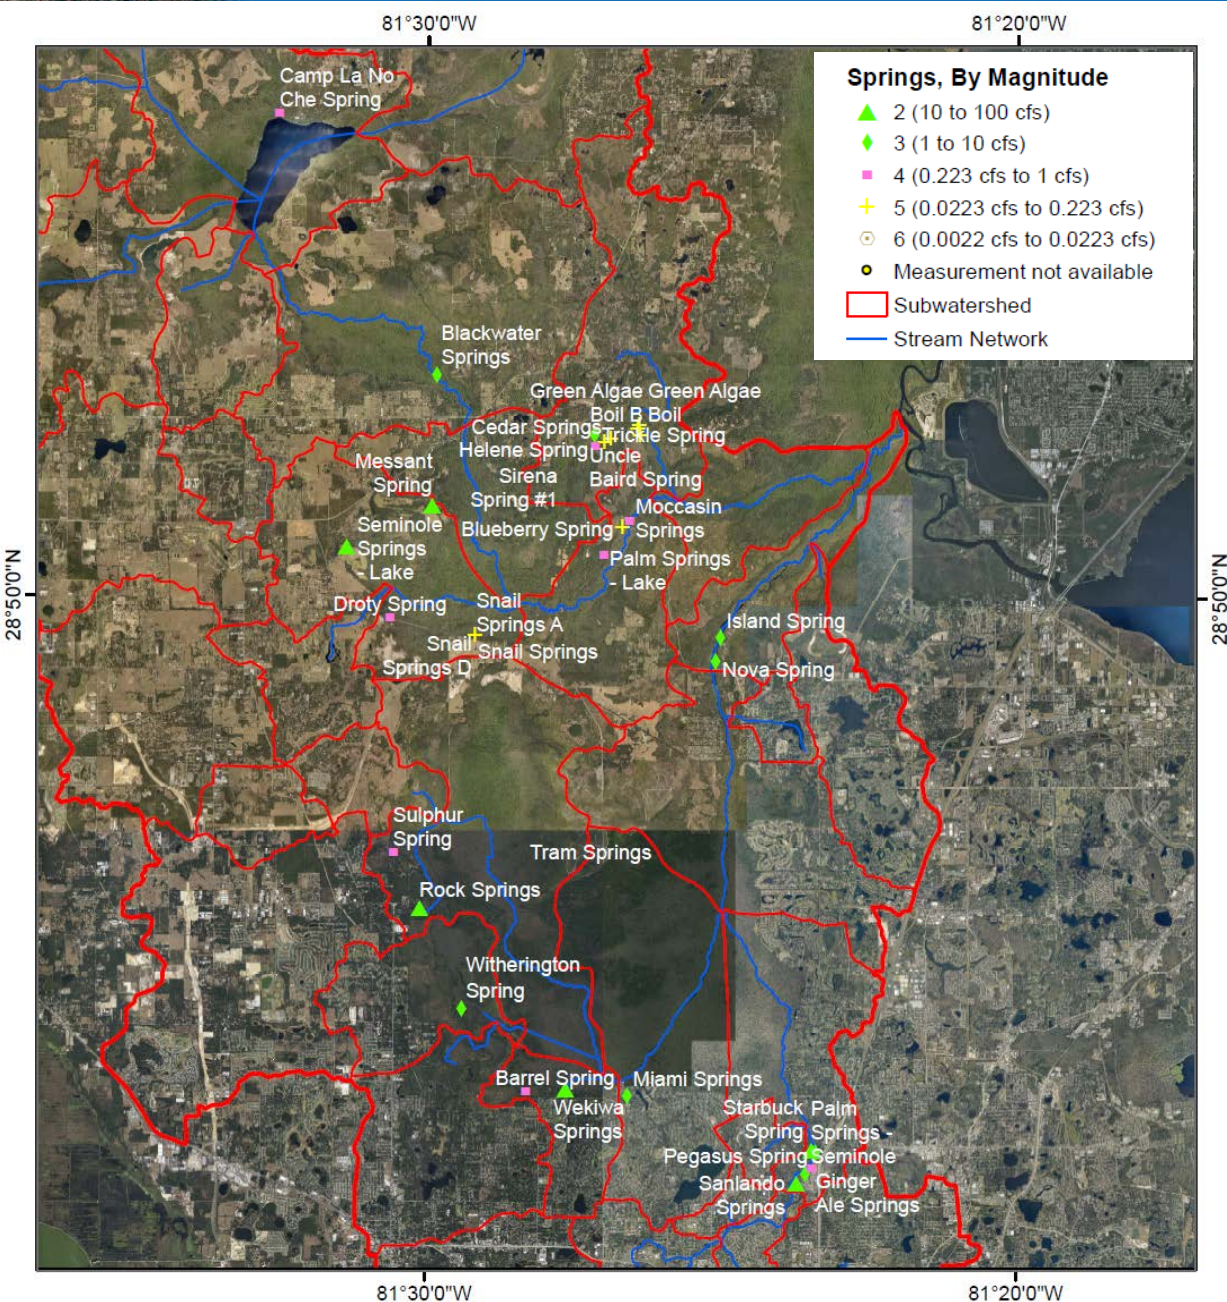

- **Precipitation**
 - Avg. annual:
51 inches (1970-2016)
 - Thiessen Polygon
- **Potential evapotranspiration (PET)**
 - Hargreaves method adjusted with USGS satellite ET data (GOES)

Land Use Data

- Urban: 27.7%
- Pasture: 8.5%
- Agriculture: 11.4%
- Forest: 24.3%
- Water and wetland: 28.1%
- 13 land use classes

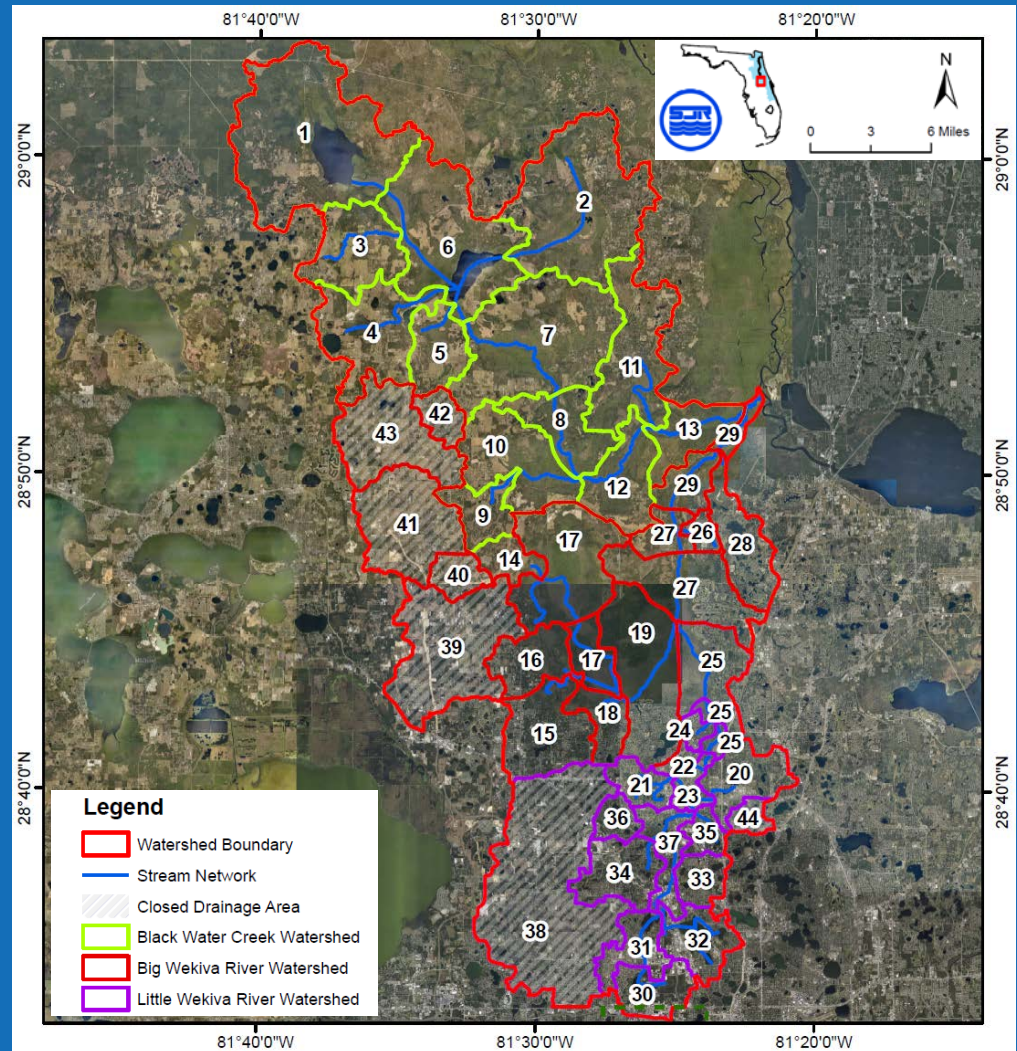

Springs data

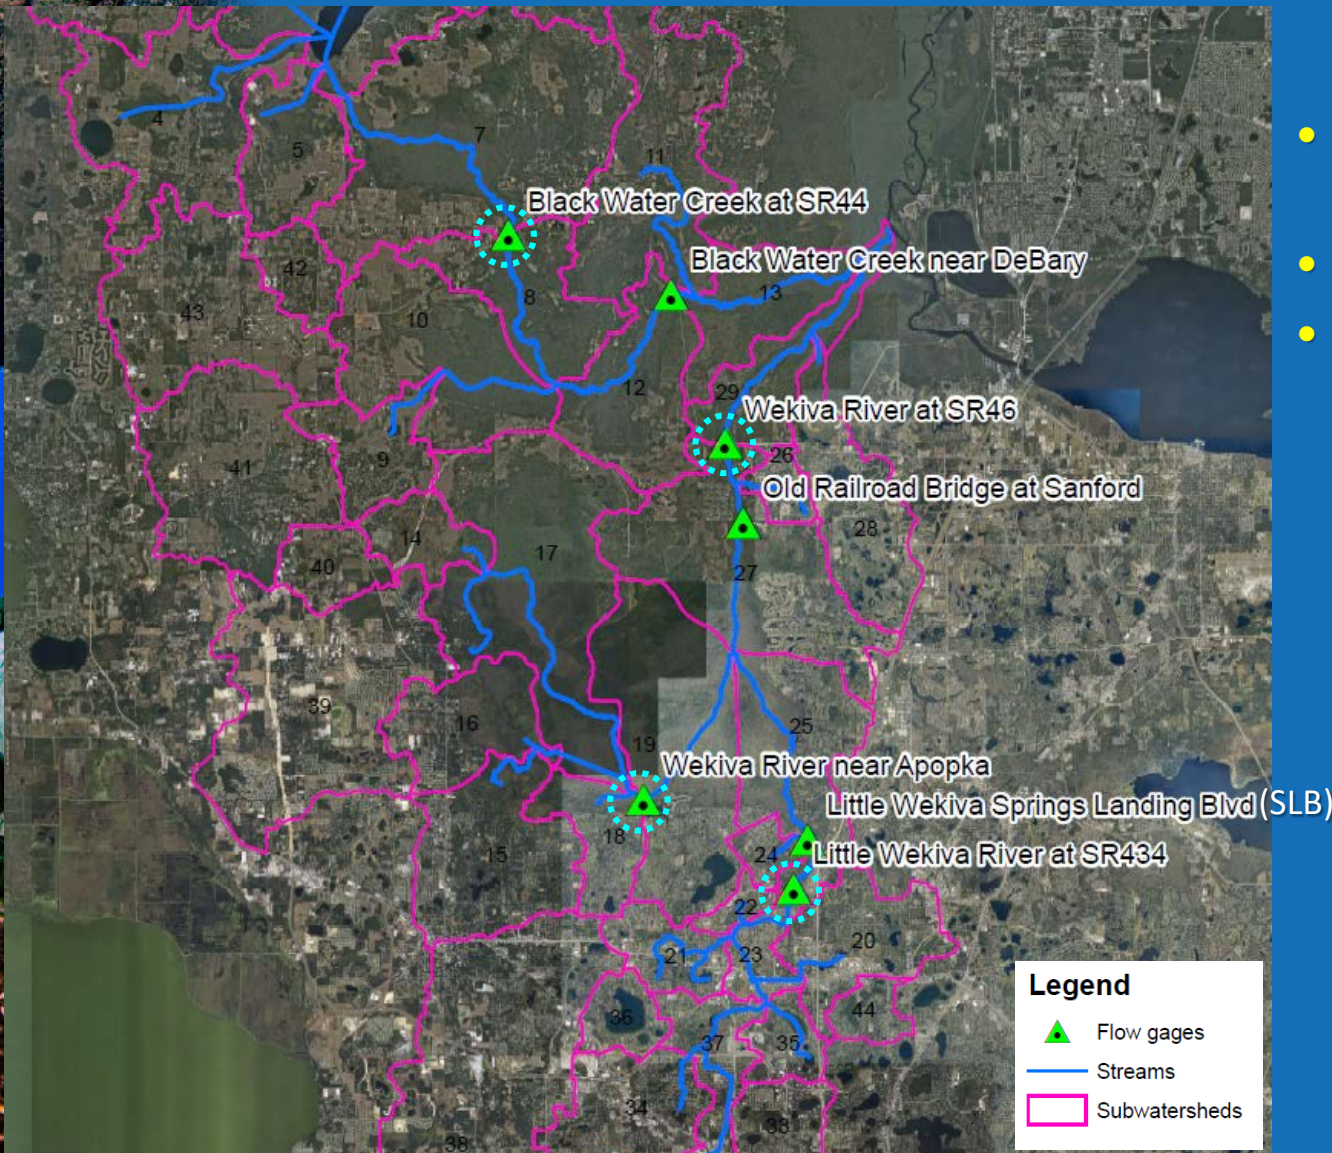

- 34 springs
- Major springs
 - Wekiwa (62 cfs)
 - Rock (56)
 - Seminole (36)
 - Sanlando (20)
 - Starbuck (12)
 - Messant (14)

Hydrologic Model Setup

- Hydrologic Simulation Program – Fortran (HSPF)
- 44 subwatersheds
- 3 sub-models
 - Black Water Creek watershed (13 subsheds)
 - Little Wekiva River watershed (16)
 - Wekiva River watershed (15)

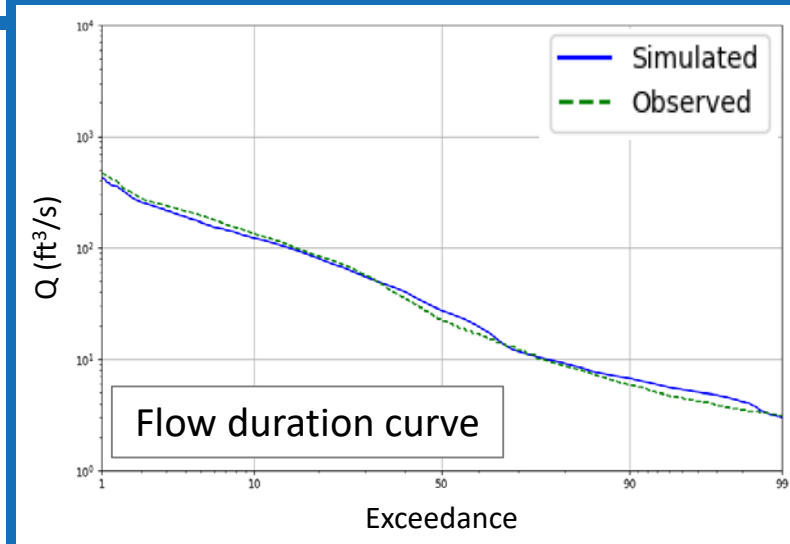

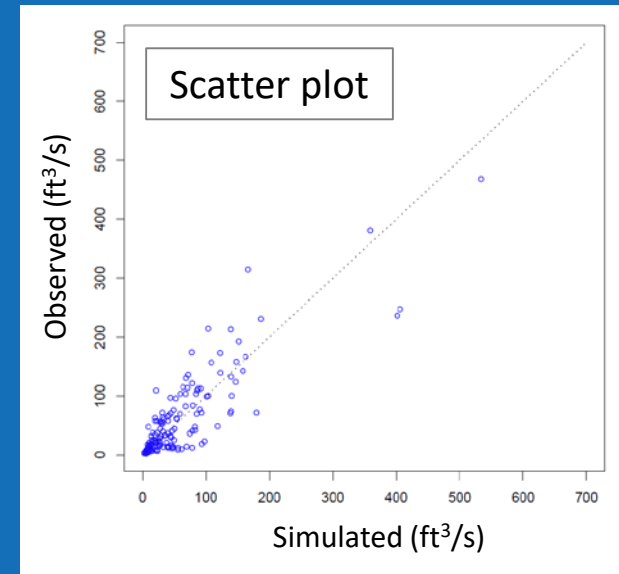

Hydrologic model calibration

- Parameter estimation using PEST
- 7 stream flow gages
- 2003-2016 (14 yrs)
 - SLB: 2003-2009
 - Near Apopka: 2003-2011, 2016

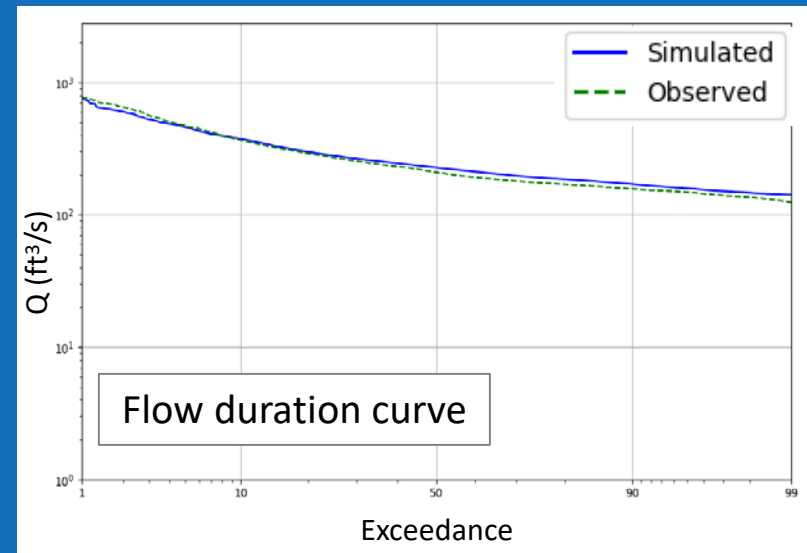

Black Water Creek - SR44

Little Wekiva River - SR434

Wekiva River - SR46

Wekiva River - Near Apopka

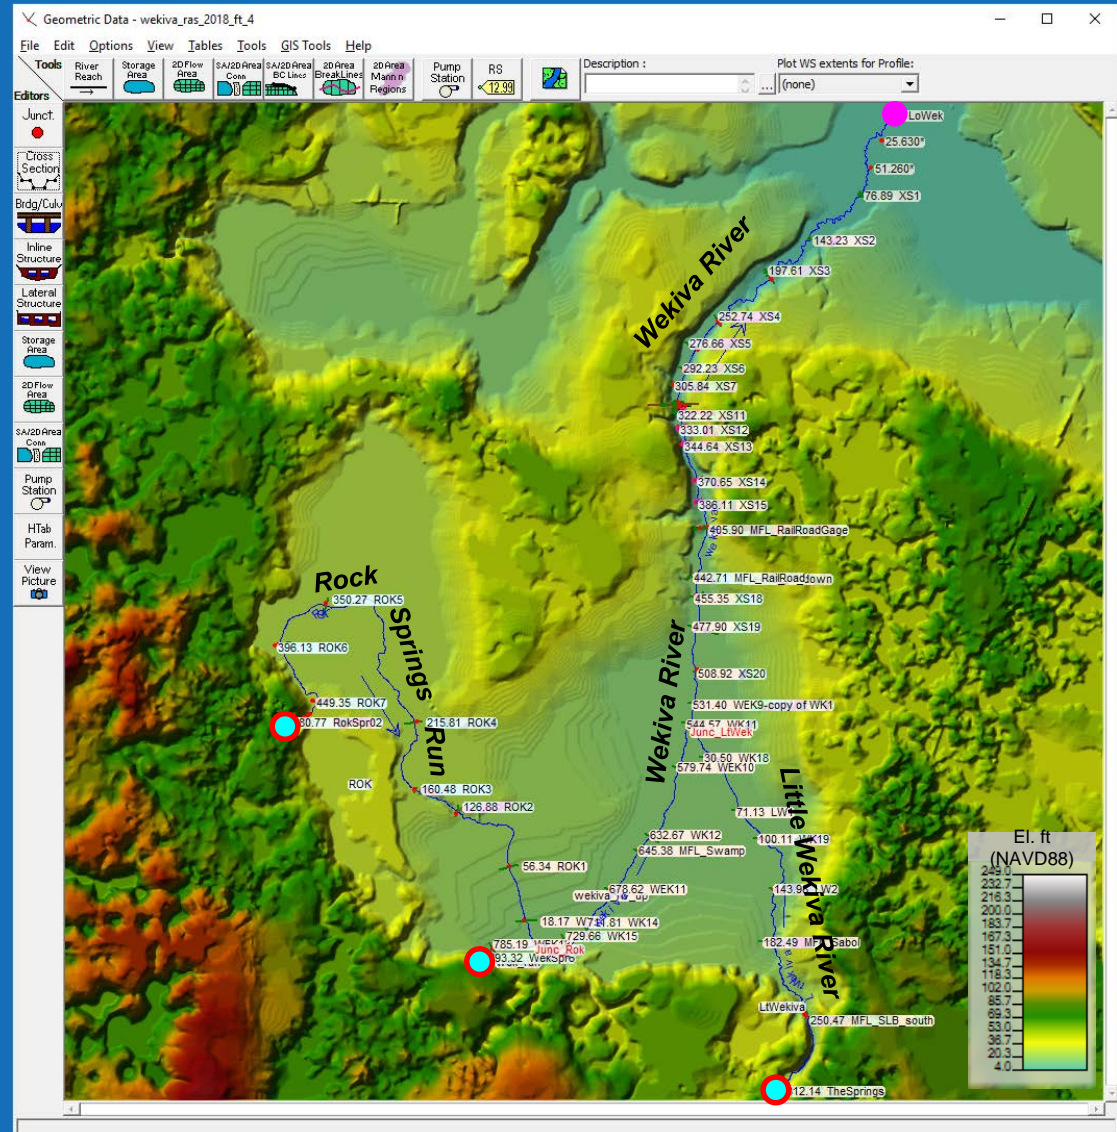

Hydrologic model performance

| Statistics | | Black Water Creek | | Little Wekiva River | | Wekiva River | | |
|------------|----------------|-------------------|--------------|---------------------|--------|--------------|-------------------|-------|
| | | SR44 | Near Debarry | SR434 | SLB | Near Apopka | Old Railroad (RR) | SR46 |
| Daily | R ² | 0.69 | 0.64 | 0.69 | 0.76 | 0.50 | 0.73 | 0.69 |
| | PBIAS % | -1.00 | -1.10 | -0.40 | -6.90 | 0.00 | 4.80 | -0.30 |
| | high10% | -3.41 | 1.46 | -4.29 | -15.02 | -6.91 | -1.52 | -3.99 |
| | low50% | 11.76 | 0.90 | -1.26 | 9.99 | 0.53 | 9.28 | 4.28 |
| | NSE | 0.63 | 0.53 | 0.67 | 0.76 | 0.45 | 0.71 | 0.67 |
| | | | | | | | | |
| Monthly | R ² | 0.75 | 0.70 | 0.79 | 0.82 | 0.45 | 0.77 | 0.72 |
| | PBIAS % | -1.30 | -1.20 | -0.50 | -6.60 | 0.10 | 4.80 | -0.30 |
| | NSE | 0.72 | 0.65 | 0.79 | 0.80 | 0.34 | 0.74 | 0.70 |

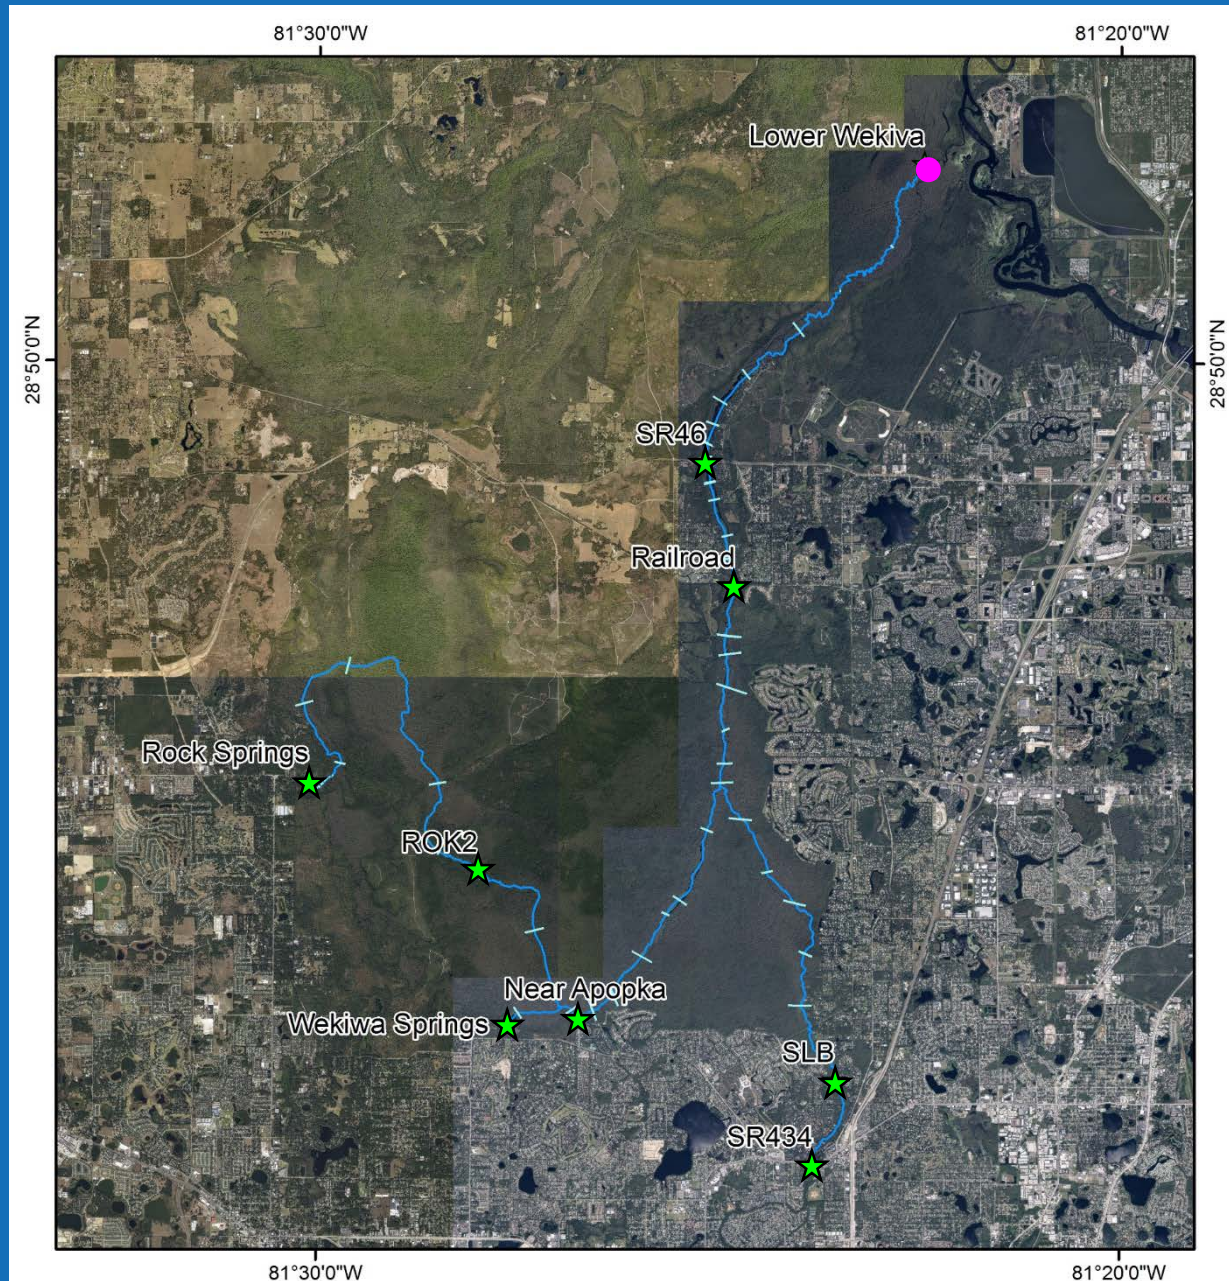

Hydraulic modeling in the Wekiva River

- **HEC-RAS**
- **72 stream cross sections**
- **Boundary conditions**
 - 3 upstream flow boundaries (●)
 - 1 downstream stg boundary (●)
 - Internal boundary conditions using the HSPF model results
- **Steady state**
 - 13 surface water profiles between 2008-2016
- **Unsteady state**
 - 6-month period in 2009

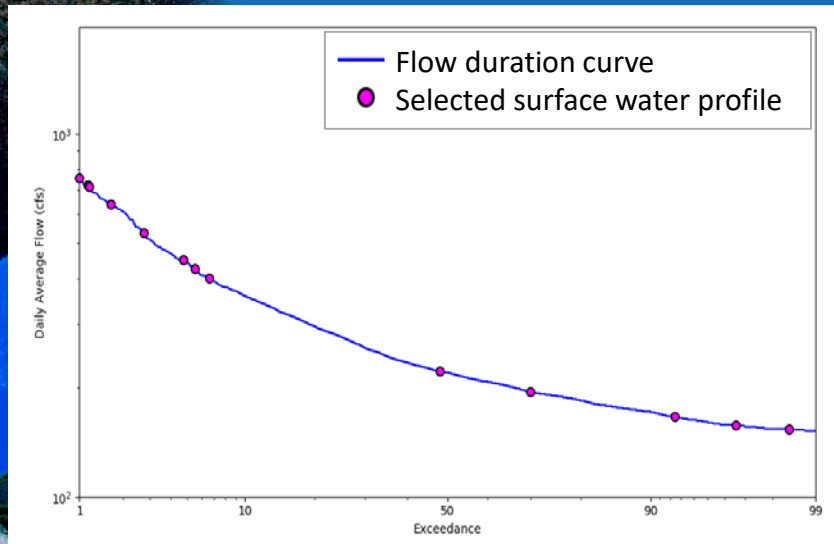

Hydraulic model calibration

- 8 stream stage gages(★)
- Data period: 2008-2016
 - SLB: 2008-2009
 - ROK2: 2014-2016
 - Near Apopka: 2008-2012, 2016

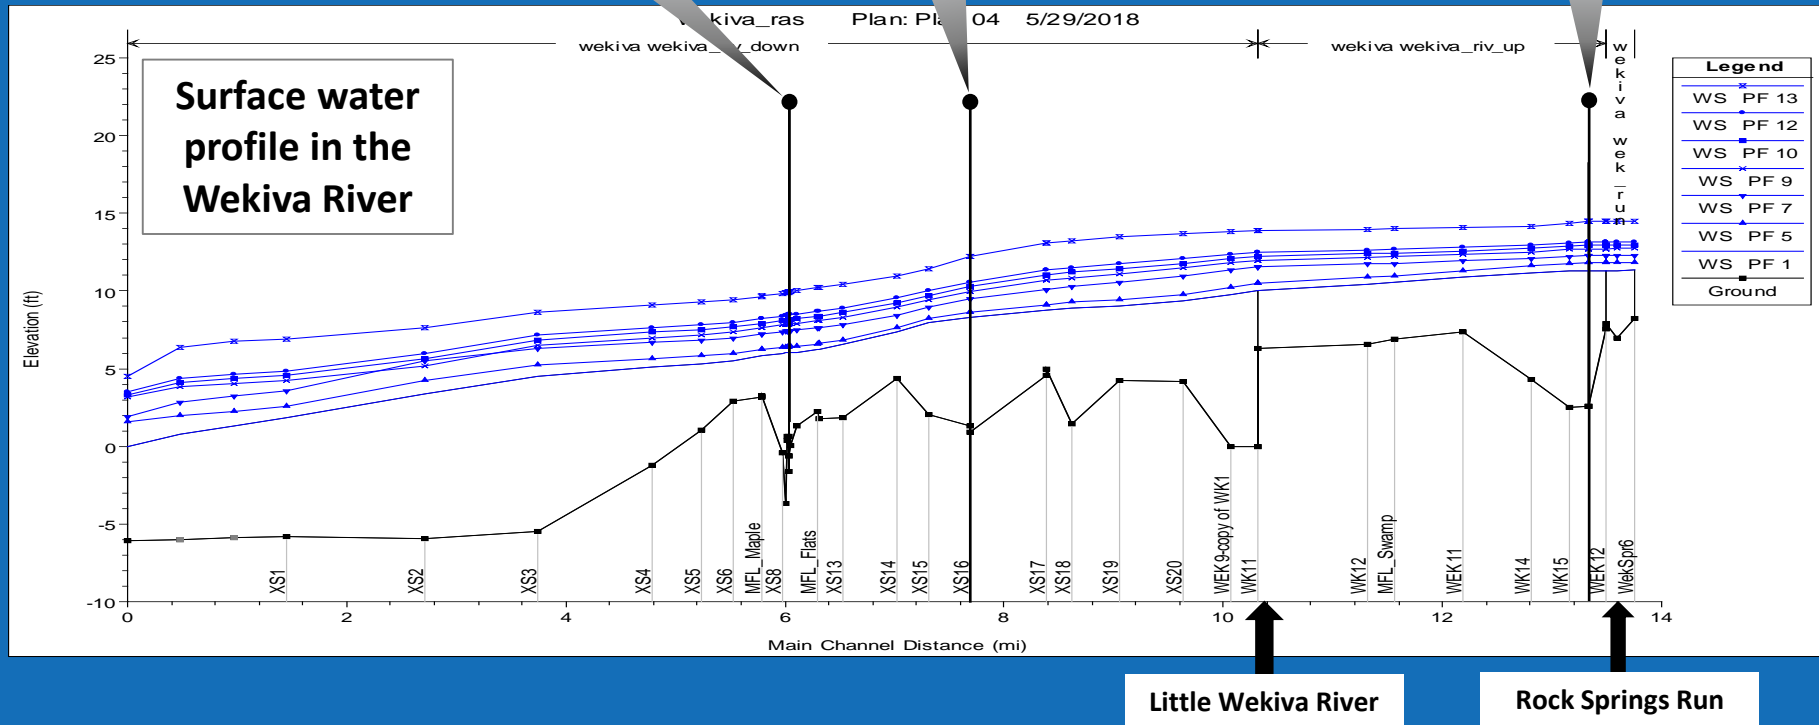

Steady state – selected surface water profile

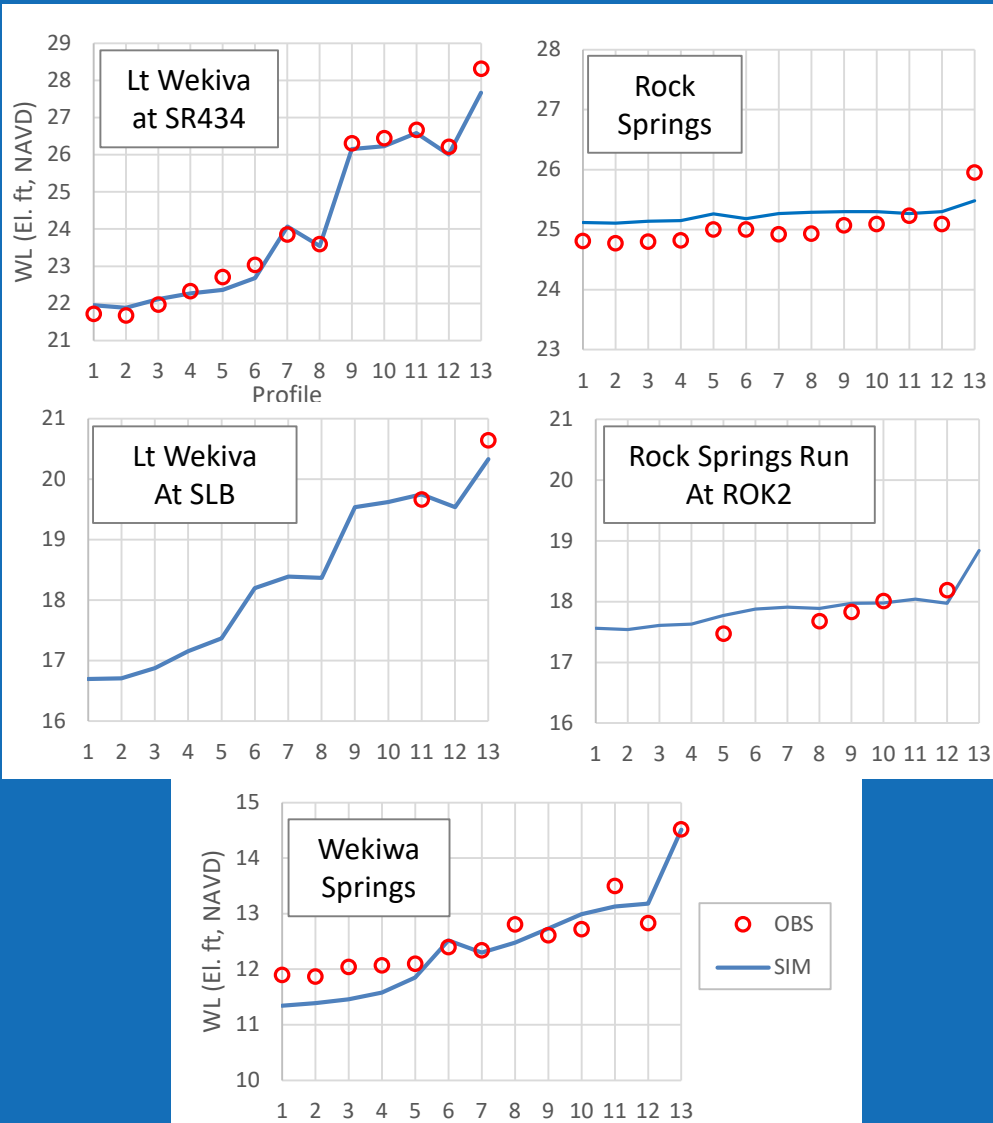

**Flow duration curve at SR46
in the Wekiva River
(2008-2016)**

| Profile | Date | Flow at SR46 | % flow at SR46 |
|---------|-----------|--------------|----------------|
| PF1 | 4/17/2012 | 150 | 0.6 |
| PF2 | 5/14/2012 | 155 | 2.3 |
| PF3 | 4/9/2013 | 164 | 6.5 |
| PF4 | 5/14/2013 | 196 | 31.0 |
| PF5 | 2/15/2016 | 225 | 54.0 |
| PF6 | 8/27/2012 | 407 | 93.7 |
| PF7 | 9/9/2015 | 467 | 95.9 |
| PF8 | 12/4/2014 | 479 | 96.3 |
| PF9 | 9/30/2014 | 665 | 98.6 |
| PF10 | 10/1/2014 | 797 | 99.2 |
| PF11 | 5/22/2009 | 922 | 99.6 |
| PF12 | 10/2/2014 | 927 | 99.6 |
| PF13 | 8/23/2008 | 1740 | 100.0 |

Simulation result - steady state

Simulation result - steady state

Comparison of simulated and observed stages in all 8 stations

Unsteady state – simulation period

- Selected simulation period covers flow exceedance between 0.43 – 93.28%

**Flow duration curve at SR46
in the Wekiva River
(2008-2016)**

Stream flow in the Wekiva River at SR46

Simulation result - unsteady state

Simulation result - unsteady state

Little Wekiva River at SR434

Rock Springs

Little Wekiva River at SLB

Wekiwa Springs

Simulation result - unsteady state

| Stream | Station | Diff. in ft (Obs. – Sim.) | | | R ² | RMSE | PBIAS (%) |
|---------------------|----------------|---------------------------|-------|-------|----------------|------|-----------|
| | | Mean | Max | Min | | | |
| Little Wekiva River | SR434 | 0.07 | 0.23 | -0.46 | 0.96 | 0.32 | 0.27 |
| | SLB | 0.03 | 0.15 | -0.04 | 0.99 | 0.11 | 0.14 |
