

Guiding Questions

- Which areas of the spring shed of Silver Springs contribute the highest N loads to the springs?
- What are the major drivers of PPCS and what is the relative influence and controllability of each?
- Will $[\text{NO}_x]$ reduction be sufficient to restore primary producer community structure?

The SJRMWD Springs Protection Initiative

Management Implications

Scientific Findings

Management Tools

- Minimum flow and levels
- Environmental Resource Permits
- Consumptive Use Permits
- Basin Management Action Plans
- Water Supply Planning
- Projects
